

Mozello - the easiest way to build your own website, blog or online store

Mozello is the easiest way of building stylish, minimalistic websites, blogs and online stores. It is much faster and easier to use than any other website builder thanks to unrivaled focus on simplicity and usability.

Excellent mobile support

Mozello provides excellent mobile device support by producing truly responsive mobile-ready websites that look work well and look uniform across wide range of screen sizes. No cutting corners with separate, stripped down mobile website versions.

Mozello is the first web-based site builder that works directly on mobile browsers without any need for installing special apps.

Modern, minimalistic, responsive design choices

Website authors can choose from a wide array of modern, minimalistic design templates. All templates are responsive and mobile-ready and every template is easily customizable.

Multi-language support

Built-in multiple language support is extremely beneficial for International websites and also for customers in multilingual areas such as Quebec, Switzerland, Belgium, the Baltics and others.

Marketing features

Mozello is SEO friendly and provides all the necessary instruments for professional online marketing, including sitemaps, META tags for separate pages and support for Google Analytics.

Sophisticated infrastructure

To ensure excellent speed, reliability and plentiful resources, Mozello uses cloud storage, content delivery networks and mirrored infrastructure.

Generous free and premium service plans

Free service plan is available along with just one all-inclusive Premium service plan. Both service plans are ad-free, include online store, mobile-support and unlimited pages.

The \$6/month Premium plan offers unmatched value by featuring 50 Gb of storage space and advanced shopping cart for up to 1000 items.
